(54) Title: SYSTEM FOR CONDUCTING CLINICAL TRIALS

(57) Abstract: There is disclosed a system (1) for conducting a clinical trial of a pharmaceutical substance on a plurality of trial participants. The system (1) includes a central database (2) having a memory means in communication with a database means, one or more trial sites each having a remote computer (3) located remotely from the central database (2) and in communication therewith, the central database (2) being configured to receive predetermined parameters of the trial, both the central database (2) and the remote computers (3) being configured to receive predetermined trial data from one or more trial participants, the central database (2) being configured to control and track the ordering, allocation and dispensing of the pharmaceutical substances and compiling a pharmaceutical substance inventory record on the central database, and the central database (2) being configured to terminate the clinical trial in response to one or more predetermined trial termination conditions. A method of conducting a clinical trial of a pharmaceutical substance on a plurality of trial participants is also disclosed.
